Final project specifications

Create a specification of your final project that answers the following questions:

- Who is your audience?

  My audience will be kids wanting to play games

- Where will it run (your computer, a friend's phone...)?

  It will run on my computor

- What are your user's challenges and goals?

  My users goals will be to survive and

- Draw a sketch of the UI layout

- What is the new thing you want to add?

  Music and a button to make a new object

  Have a conversation with someone else in your life about what you are planning. Ask them to answer the questions:

- Does this seem achievable?

  Yes but it will be hard

Make a specific amount of all towers you can place and a ranking if elif elif and everytime you buy a tower is makes a tower variable false

Comments:

Nik: make a grid and an imput box to place your tower
